

UCSD Confessions

ANALYSIS

Curtis L. - Tyler F. - Meihan Z.

What is UCSD Confessions?

- Facebook Group:
"Confessions at UCSD Community"
- For UCSD students
- Properties:
 - Anonymous submissions
 - Broad topics
 - Minimal Filtering
- **Good proxy for UCSD collective consciousness**

How to Collect dataset?

Problem: How to Collect dataset?

1. webscrape?
2. **ask the Admins!**

Procedure:

1. Download Excel sheets from Drive
2. Use Pandas DataFrames in Python
3. Do data analysis!

Using Big Data for Community Benefit

- Help the Admins organize confessions
- Tracking trends over time
 - Mental health, relationships, sleep, etc
- Help students plan events

Summary of Confessions Tags

- Tags are optional, self-reported
- Underutilized, arbitrary -> not useful

Sentiment Analysis Methods

Lexicon Scoring

- Polarity count
- Valence, Arousal, Dominance
- Valence Aware Sentiment Reasoner
- Emotion

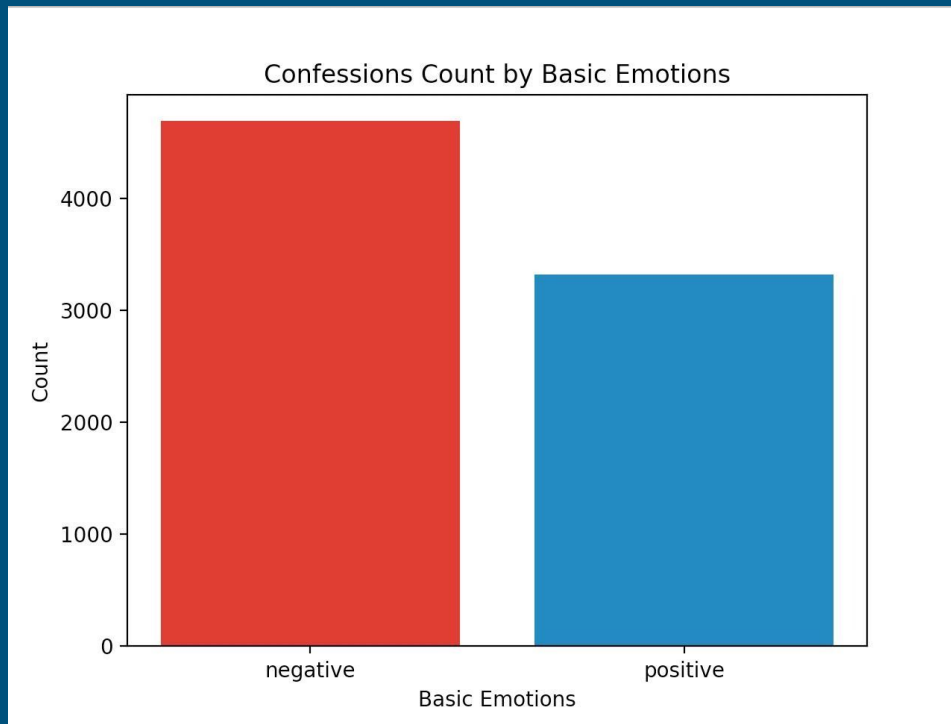

Word Embeddings

- Clustering
- Similarity Search

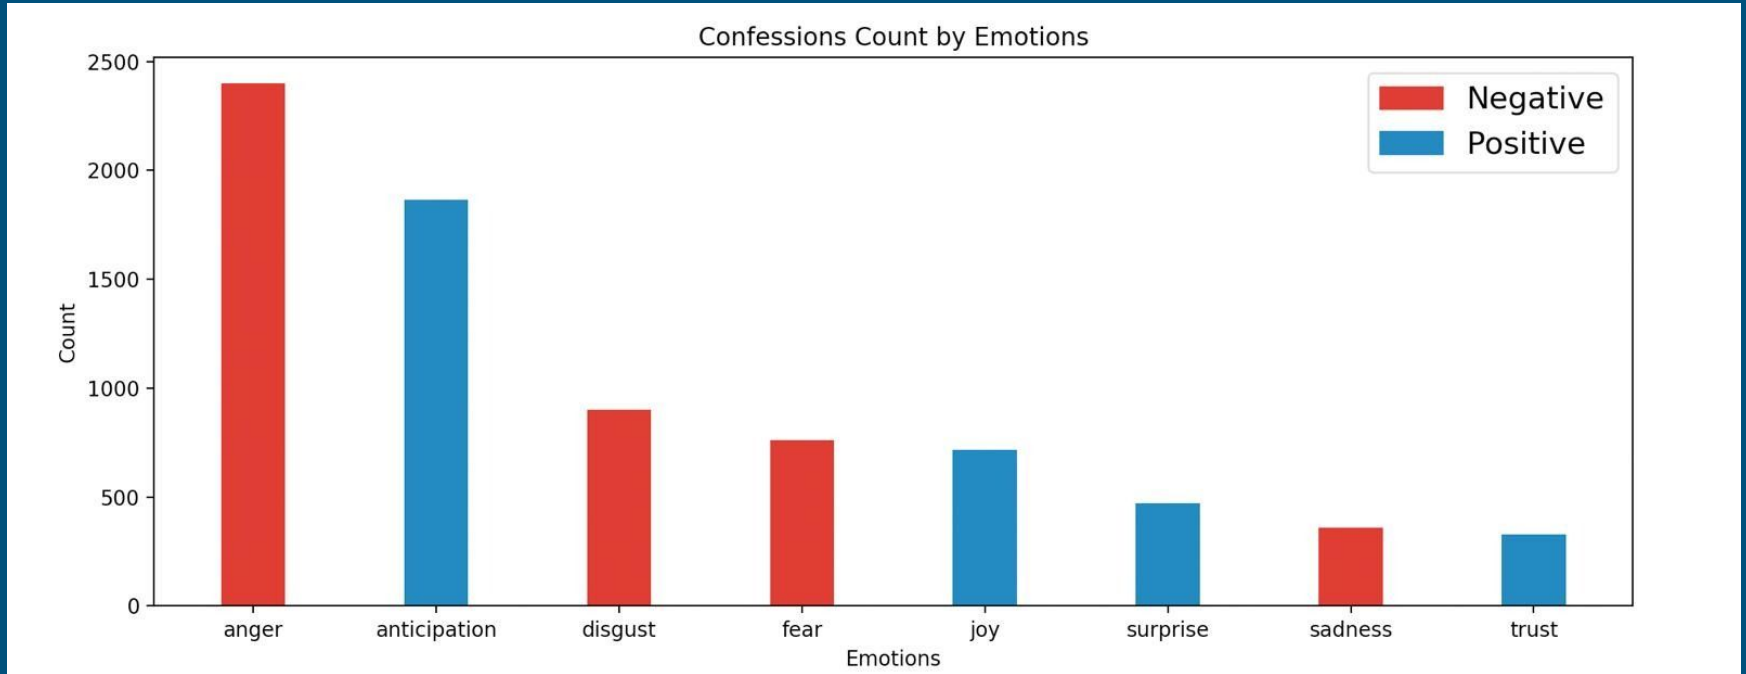

Tools: Nltk, Vader, Sklearn, Gensim, Word2Vec, WordCloud, Pandas, Numpy

Sources: <http://saifmohammad.com/WebPages/lexicons.html>

Confession Count: Positive vs. Negative

Confession Count: Emotion Category

- Confessions are primarily classified with anger and anticipation

Emotion Classification across Weekdays

- Inverse relationship between positive and negative emotions over the week

Valence Arousal and Dominance

- Confessions are more excited and energized over Weekends!

“Valence Aware” Sentiment Reasoning

- Confessions posted in the early morning are more positive overall!

Binary Clusters with Valence Filtering

Positive

Negative

- Reasonable , interesting themes emerge!

Proof of Concept: Auto-Tagging

Use Word2Vec similarity thresholding to “suggest” possible tags
(stressed, sad, relationship, school)

Example:

"I am having a really rough day, my girl just dumped with me, AND I failed an exam."

Result: “sad”

	stressed	sad	relationship	school
0	tbh	insecure	feeling	high
1	terrible	bad	now	classes
2	frustrated	awkward	fwb	college
3	anxious	alone	feelings	quarter
4	missing	depressed	ready	year
5	losing	feeling	lost	ucsd
6	accepted	uncomfortable	sex	gpa
7	caps	scared	having	beginning
8	struggling	worried	boyfriend	getting
9	rejected	afraid	connection	anxiety

When is UCSD stressed & depressed? 🙄

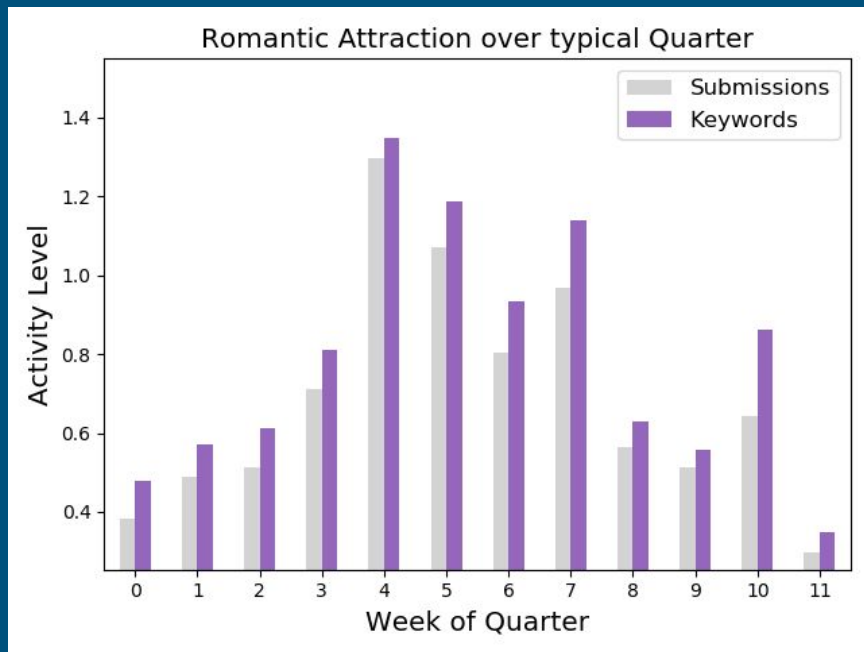

*Activity Levels are normalized

- Midterm and Finals Season
- Kicks in week 3
- Reduces a bit weeks 8-9
- **Best time for destressor events:**
 - **weeks 3 to 10**

Did you know? The Zone at UCSD offers destress events with Therapy Fluffies!

When does UCSD fall in love? 🥰

*Activity Levels are normalized

- Follows submission activity
- Possibly correlated with stress & depression
- **Most romantic weeks:**
 - **weeks 4-7 and 10**

Did you know? According to FB, 28% of married college graduates attended the same college.

When is UCSD asleep?

- Overall, Tritons sleep at fairly consistent times.
- Slightly less on weekdays, later bedtime at end-of-quarter
- **Best time for events: 10AM to 11PM**

THANK YOU!

Did you know?

If 75% fill out CAPE, Prof. Unpingco will allow an alternate grading scale!
